

Tree Measurement Information

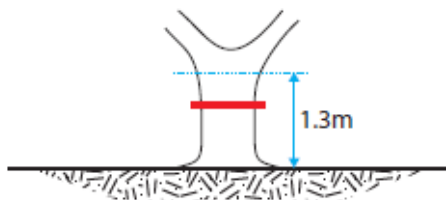

Environment Department: 604-990-2480, environment@dnv.org

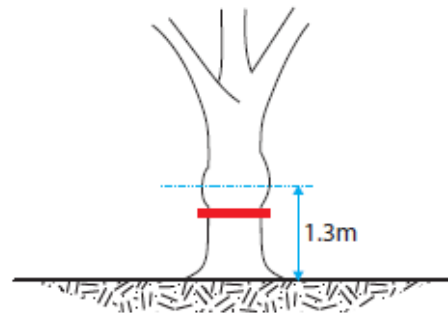

a) Stem diameter measured at 1.3m above ground level

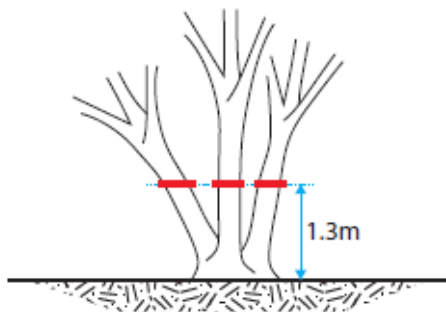

b) Measurement on sloping ground

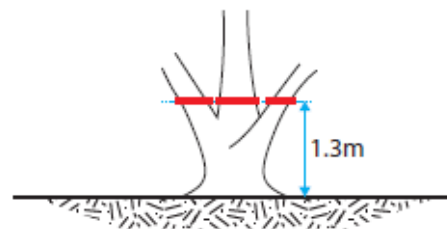

c) Trees with low branching measured at narrowest point below the fork

d) Measurement of stem with irregular swelling made at the narrowest point below the swelling

e) Measurement of a multi-stemmed tree*

f) Measurement of a tree with more than one stem at 1.3m above ground level*

* Sum of 100% of the diameter of the largest stem and 60% of the diameter of each additional stem
NOTE: All stem measurements are to be rounded up to the nearest cm (example: 74.5cm --> 75cm)
