925-5911
E: firesafetyplans@dnv.org

PRE-INCIDENT PLAN REQUIREMENTS

District of North Vancouver Fire & Rescue Services now requires Pre-Incident Plans to be sent along with the Fire Safety Plan. A Pre-Incident Plan consists of a set of site and floor plan drawings taken from the Fire Safety Plan that have been formatted to be 'Firefighter Specific'. In addition, general and detailed information about the building is gathered in what is referred to as the 'Vital Information Form'. The Pre-Incident Plan includes all life safety symbols except fire extinguishers and pull stations. Pre-Incident Plan requirements are permitted under the District of North Vancouver Fire Bylaw.

PRE-INCIDENT PLAN REQUIREMENTS

Pre-Incident Plans shall consist of the following:

- Vital Information Form
- Site Plan Drawings (extinguishers and pull stations removed)
- Floor Plan Drawings (extinguishers and pull stations removed)

For additional information regarding Site Plan & Floor Plan Drawings, refer to the DNVFRS Drawing Requirements for Fire Safety Plans and Pre-Incident Fire Safety Plans 2020.

VITAL INFORMATION FORM

The following is a list of TDG (Transportation of Dangerous Goods) classes and the regulated quantities for each. Use this list as a guide when determining whether a specific product / waste should appear in the **Dangerous Goods & Hazmat Information** section of the DNVFRS Vital Information Form and drawings if applicable.

CLASS	REGULATED QUANTITY	EXAMP LE
Class 1	Any Amount	Explosive (ie. Fireworks)
Class 2	Any Amount	Propane
Class 3	Any Amount	Solvent
Class 4	Any Amount	Aluminum Phosphate
Class 5	Any Amount	Hydrogen Peroxide
Class 6	100 kilograms or 205 litres	Cyanide
Class 7	Any Amount	Radioactive Material
Class 8	100 kilograms or 205 litres	Car Batteries

Class 9.1	100 kilograms or 205 litres	Miscellaneous Goods
Class 9.2	Not Required	N/A
Class 9.3	5 kilograms or 5 litres	Motor Oil
